Declaration of non use of
Persistent Organic Pollutants (POPs)
covered by Regulation (EU) 2019/1021

SOS electronic, as a supplier of electronic components, has been aware of the responsibilities for protecting the environment and human health. We has always kept on tracking the update of prohibited substances and restricted substances listed in the POPs Regulation and verify the presence of any substance in products we supply.

Based on our suppliers' information, as of this moment, this is to declare that electronic components delivered from SOS electronic do not contain any of persistent organic pollutants listed in annex I, III or IV of Regulation (EU) 2019/1021.

However, the presence of very minute but analytically detectable traces of these substances in the product originating from raw material impurities, or as adventitious contaminants, cannot be fully excluded. We can assure you that, according to the manufacturer's information, potential traces of these substances in products we supply, if any, are far below 0.1%.
